

FAUX SNOW

Mixing Instructions

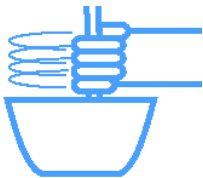

Faux Snow is amazingly easy to mix and maintain!
Just follow these simple steps and you'll be able to enjoy Faux Snow in minutes.....

Put some Faux Snow in a clean bowl or bucket

Add clean water and watch it slowly turn into snow!

Stir a few times until the water is absorbed

Gradually add water until you get the consistency of snow you prefer

MAINTENANCE - Faux Snow should be misted and "fluffed up" every few days. Add just enough water to restore it to its original look. "Wetter" snow will need less misting than dryer snow.

DISPOSAL - Add Faux Snow to a garden bed or potted plant soil and it will help the soil hold moisture. If spilled, you should sweep up and remove. Faux Snow does not stain surfaces and is non-toxic, biodegradable and environmentally friendly.

SAFETY - please note this is a water-based product and can be slippery - care should be taken to make sure it is not used in areas where any people are walking. It should be totally removed afterwards to avoid any potential safety issues.

Material safety data Sheets are available on the website.

PLEASE NOTE *Snowmasters Australia does not set up the Faux Snow nor is it responsible for any removal of this product.*
